

YOUR DENTAL IMPLANT SAFETY IS OUR PRIORITY!

The Dental Implant Registry (DIR) is a not-for-profit organisation that securely collects and stores dental implant information to improve long-term patient care. Powered by advanced software from Implant Registries, the DIR enables fast, secure access to implant data-supporting safe, efficient treatment for patients and clinicians at DIR Registered Practices across Australia and New Zealand.

The DIR is a FREE service!

"By choosing a DIR Registered Practice, you receive research based care and full access to your implant information"

DID YOU KNOW?

- Although uncommon, implant complications can occur.
- Some of these complications can lead to the loss of the implant.
- Access to your implant details enables your treating dentist (which may not be the original dentist), to address any complications and maintain your healthy implant.

ADVANTAGES FOR PATIENTS

Enable quick and efficient treatment of any complications with access to your information 24/7

Your information is retained and accessible outside of practice records for your lifetime

Ensure your implant parts are government compliant

Know exactly what parts and materials have been used in your implant and bone graft materials

Minimise complications

Secure information with password protection

- Participation in the DIR is on an opt-out basis – you will automatically be included unless you choose not to.
- If you would like more information, or to request a copy of the Patient Information Sheet (PIS), please contact: admin@dentalimplantregistry.org.au
